## **Dr Astrid Lindner**

### **Stability tests of bicycles: a pilot study**

Dr Astrid Linder, is Research Director, Traffic Safety Swedish National Road and Transport Research Institute (VTI) in Gothenburg, Sweden, where she leads the crash safety and biomechanics research area. Astrid also holds Adjunct Professorial positions at Chalmers University of Technology and Monash University Accident Research Centre. She has extensive research experience in the area of occupant kinematics, injury prevention in vehicle crashes, mathematical simulations and test condition specifications. She has a Ph.D. in Mechanical Engineering in the area of vehicle safety and a M.Sc. in Engineering Physics.

## **Anthony Aisenberg**

### **BikeSpot: Exploring differences in the perception and real risk of injury when riding a bicycle in Melbourne**

Anthony Aisenberg is the Director of CrowdSpot, a company specialising in map-based community engagement and data collection services. He has worked with a number of Australian Local Councils including the City of Melbourne for their Bike Plan and the City of Perth for their Integrated Transport Strategy. Anthony has previously led Australia's Ride to Work Program to record participation rates, has worked as a Transport Planner with the City of Port Phillip and also has a Masters or Urban Planning from the University of Melbourne.

## **Phoebe Dunn**

### **Safe cycling in Australia: a national perspective on change.**

Phoebe Dunn is the Chief Executive Officer of the Amy Gillett Foundation. The Amy Gillett Foundation is the national cycling safety organisation with a mission to reduce the incidence of serious injury and death of cyclists in Australia. Prior to joining the AGF in October 2015, Phoebe held leadership and senior management roles with the Commonwealth and Victorian governments and was a senior lawyer with leading international law firm Ashurst (formerly Blake Dawson).

## **Carly Hunter and Kenn Beer**

### **The Victorian Government's cycling infrastructure investment**

**Carly Hunter** is a Project Coordinator within the newly developed Safe System Road Infrastructure Program Team at VicRoads. Carly is leading the development of a new \$70 million program targeted at increasing safe cycling participation on Victoria's strategic cycling corridors. Carly has previously worked across different areas of road safety in VicRoads and her recent work on level crossing removals has shaped her ability to develop solutions in confined environments with competing demands. She has a Bachelor of Civil Engineering from Monash University.

**Kenn Beer** is an engineer and transport planner with experience in active transport safety in Australia, New Zealand and the USA. Throughout his career, Kenn has worked in delivery, development, planning and program roles within the Victorian Government. After leaving VicRoads in 2013, Kenn founded Safe System Solutions Pty Ltd – a specialist road safety engineering consultancy. Safe System Solutions has provided active transport infrastructure safety advice to VicRoads, the TAC, Transport for NSW and numerous Victorian local governments. Safe System Solutions provided advice to VicRoads and the TAC on the development of the Guidelines for the \$70 million cycling safety program.
